SKILLS

- Web Development: HTML5, CSS, JS, Python, C++, Java, C
- Video Editing: Davinci Resolve, After Effects, Inshot
- Graphic Designing: Figma, Canva
- Content Marketing: Reddit, Youtube
- Web UI/UX Designing: Figma

EDUCATION

- Class 12th: DAV Public School (CBSE)-83.8%
- Class 10th: International School(ICSE)-90%
- First Year Btech Student at MITAOE Alandi

LANGUAGES

- Hindi
- English
- Japanese

ABOUT ME

I am a first-year engineering student in MITAOE, Alandi. I am particularly interested in coding, web development, and graphic design, and I enjoy building projects that combine functionality with aesthetics. I am constantly exploring new tools and technologies, with the goal of creating impactful digital products and gaining practical experience.

I value independence, continuous learning, and adaptability, and I am open to opportunities that challenge me to grow, collaborate, and contribute meaningfully in the tech space.

WORK EXPERIENCE

- Developed an intelligent agentic AI system capable of detecting potential danger using audio cues (screaming) and motion patterns (phone shaking) with Integrated automated alert mechanism to notify nearest police authorities and emergency contacts with user details
- Built a gamified study tracking web platform enabling users to compete with others in real-time learning sessions and Implemented detailed performance analytics and progress insights to improve study efficiency
- Developed a web-based system to check real-time availability of books in college library and implemented book location tracking within the library for easy access, also added reservation functionality, allowing users to book and secure books in advance
- Designed and built a floor-cleaning robot capable of mopping surfaces autonomously that focuses on basic robotics integration including movement control and cleaning mechanism
- Created high-quality video edits across multiple categories (cinematic, social media, etc.). Applied advanced editing techniques including transitions, color grading, and storytelling
- Designed professional business card for a coaching institute. Worked on visual identity elements with focus on clean design and branding aesthetics
- Participated in a competitive hackathon focused on agentic AI solutions. Participated in a Inter College Hackathon
